

Custom Decorative Direct/Indirect Pendant Lighting

eps **A** lume

Light in Style

Lite Energy is a leader in custom lighting designs. With their innovative and functional designs they lead by example by introducing the **epsAlume** family. 8 different series of fixtures: Atlanta, Boston, Chicago, Dallas, Miami, New York, San Francisco and Seattle are all offered in pendant, cluster, sconce, ADA sconce and close-to-ceiling models. Each of them will be able to solve unique lighting challenges for a wide range of large and small-scale interior environments.

All models cover a design range of sleek, classic, elegant and contemporary lines enhancing any interior decors and creating a distinct ambiance within the architectural space. The **epsAlume** family is ideal for diverse applications such as shopping malls, offices, lobbies, libraries, banquet halls, boardrooms, gymnasiums and showrooms.

Benefits of using a **epsAlume** fixture are numerous. While the luminous diffuser creates a soft illumination, the indirect lighting provided by the **epsAlume** family provides maximum visual comfort to occupants. This family also offers a variety of mounting options allowing any interior designers to combine different models while keeping a uniform look throughout the environment. A rigid construction and a spun and fabricated housing assure the durability of the product.

Take advantage of the flexibility offered by all these families to help your customers solve unique lighting challenges

Custom, street-level outdoor wall mounted luminaires specifically designed and built to complement the architectural features of this commercial building with no visible fasteners or hardware.

Decorative, perforated stainless steel, facia illuminated by recessed low wattage MH up lights.

Custom, direct/indirect pendant luminaires utilize a 4' wide x 5' long 'barrel' design with opal acrylic shroud and perforated end plates that are illuminated by T8 dimmable fluorescent lamps.

Whatever your lighting needs Pa-Co Lighting's custom design division, Lite Energy has vast experience and technical expertise to illuminate interiors and set the mood of today's indoor and outdoor spaces.

Through years of research and development of visually interesting and inviting lighting designs Lite Energy has earned a reputation amongst architects, engineers and lighting interior designers as a superior custom house dedicated to product innovation and excellence.

Connect With Our Extensive Selection

Over the years, we have designed and serviced installations from North America to Asia. Our lighting design specialists can customize luminaires based on your requirements, expand your concepts or create original lighting products for specific installations. In addition, Lite Energy also has a wide selection of standard designs available to you. This cross section of thousands of unique designs is only part of our flexibility and innovation available to you for your challenging lighting parameters.

Leading with Lighting Solutions

Lite Energy is backed by the reliability and resources of Pa-Co Lighting. From inception, the Lite Energy division has fostered a quality focused environment at all levels. A core group of professionals provide expertise to ensure that clients always receive the best products and service.

Custom, decorative 39" square direct/indirect pendant luminaire with painted and plated finishes and sandblasted glass panels.

40" diameter indirect bowl, suspended by concealed aircraft cable and illuminated by compact fluorescent lamps.

This 14'x14' structure combines the use of polished metals and alabaster acrylic and is illuminated by a combination of T5HO and MH PAR lamps.

These custom pendants 8' diameter and 17' high and combine both T5 fluorescent and MH lamps in a "Leaf Motif" inspired lattice and alabaster shroud.

Custom, indirect column mounted clusters constructed of 36" diameter, polished brass bowls, arms and integral mounting collar.
